- **3.** Project Updates & New Locks for the gates
- **4.** Bee Hives, Pallets, Wood Chip & Dealing with Waterlogged Soil

"Speeding - Letters are now going out to relevant plot holders direct from WTC due to verbal abuse received by onsite committee members."

A new look for the Newsletter

Editor: Mike McNamara – E14

New Look Newsletter

Welcome to our 'New Look' Newsletter. After a number of years with the same design, we thought it time for a change and have revamped the newsletter to incorporate a more modern looking design. We hope you like the look of it and of course we would welcome any feedback that that you have about design.

Notices

Allotment Plots - New Tenants & Waiting List

There have been 12 new tenants since 1st January; the waiting list is currently at 15.

Allotment Site - Annual General Meeting (AGM)

Don't forget that the AGM will be held on Monday 23rd March 2020 at the Oakwood Centre at 7.30pm.

The committee is looking to all Tenants for their input to help improve the site. Send suggestions, to the normal email address. We will issue a Special Bulletin about the AGM shortly.

Bonfires

From January 2020, new Woodley Town Council (WTC) rules mean that NO bonfires will be allowed onsite after the 1st May 2020 until the 1st Oct. 2020.

March - Some To Do's

March is the month when things start to get moving. If the weather stays cold but otherwise reasonable, you can start early by using cloches and fleece. However, keep an eye out for any of those late frosts. So with that in mind, here are some jobs that you could be getting on with during March.

- March is a good time to establish an asparagus bed if you are starting from crowns, make sure you get the spacing correct as it will be there a long time
- Mid-late March is a good time to get those Onion and Shallot sets out, using netting to keep those pesky pigeons off them till they establish
- Transplant any early peas, broad beans, cabbages or lettuce you may have started off earlier
- Sow the seed of Brussels sprouts, summer cabbage, broccoli, onions and leeks
 in short rows on a "nursery seed bed". These can be grown on to be
 transplanted in April, cover if frost predicted
- Last chance to prune your fruit while they are dormant
- Harvest any Rhubarb that has been forced for an early crop
- Clear the old leaves off strawberry plants and clean up the ground in between the plants before giving them a top dressing of a general fertiliser

"A well dug trench filled with vegetable peeling will help your Runner beans through the growing season."

Project Updates & Other items

Launchpad Charity

We have avoided having volunteers for a while because of the conditions on site, but hopefully things are improving and we can get growing and planting for 2020!

Plea: If you are starting off any seeds and have the space please add a few more for us.

For Sale

13 x Treated fence posts 2.4m x 0.75 x 0.75 (8' x 3'' x 3'') @ £7.50 / each 1 x Fence panel 1.8m x 1.8m (6' x 6') @ £ 20.00

For collection from site. Contact via normal email address or 07802 204346.

Plat Inspections

Normal Plot inspections will begin from week commencing 13th April 2020

Plot Ownership changes

The committee would like to remind all plot holders that they should not remove any items from Plots that they do not rent. Once a plot is vacated, the plot and any items on the plot remain the property of WTC and will be 'assigned' to any new plot holder that takes up the vacant plot.

Forthcoming site changes

Gate Locks

As was mentioned in last month's newsletter, WTC have given the go ahead to replace the padlocks/keys with higher security versions. It is likely that this will happen over the summer and we will issues a Special Bulletin about this important security update to the site with more details.

In the meantime we ask that all plot holders ensure that the gate is shut and locked when entering or leaving the site.

Main Gate Entrance

As we will have all seen; the main gate entrance road (Victory Row) has badly deteriorated over recent months due the recent atrocious weather.

WTC have recently inspected that area and have agreed to carry out remedial work whereby the whole of that entrance will now be re-laid.

As this will require a considerable amount of work, there will be some disruption to the entrance to the site. We will send out a Special Bulletin detailing the work and dates in due course.

A handy guide for Sowing & Harvesting

Click on these for larger version

"Site Security is important for all of us.

Please lock the gate when you enter or leave the site."

WOODLEY ALLOTMENTS NEWSLETTER March 2020

Bee Hives Area Fencing

All done; many thanks to all the volunteers for their work & for support from JB Landscaping Ltd.

Dealing with waterlogged soil

By thomasdstone.blog

We have had so much rain recently and I am always being asked what to do in the garden. Well there are so many things you can do and not do in the first place to ensure you don't damage your garden.

First of all what is water logged soil? Well it's soil that's had so much water it can't take any more, most of the spaces in the soil normally filled with air, have been filled with water and the water is more than likely to be sat on the surface.

Why does it matter? Well all plants need oxygen at their roots, the micro-organisms that live in the soil need oxygen within the soil. So basically life within the soil needs oxygen. Without it in the soil, plants and life within the soil dies.

The longer the garden is under water, the more chance the roots and life within the soil has of drowning. A few days might be manageable, weeks and weeks will cause problems unless the plant is one that's adapted to that environment like say Salix, otherwise damage will occur.

It is never a case of the plant just dying in a few days, sometimes it can take months for the effects of prolonged water logging to kill a plant, it normally happens when the tree has got all the leaves open in full summer, when the most pressure is being applied to the damaged root system.

For the full article, click here.

Pallets & Wood Chip

We continue to receive regular supplies of Pallets & Wood Chip.

Pallets can be found either by the 'Shed' or next to the Launchpad project plots.

You will also find the Wood Chip pile there which is free for all Plot holders to use on their own Plots.

Please do **NOT** take this off site.

We would like to have a Logo that represents the Allotment Association.

Please send any suggestions to the usual email address below and we will announce it at the forthcoming AGM.
